

2009

Global COE -Deep Earth Mineralogy-
2nd International Special Lecture

第2回グローバルCOE（第8回GRC）国際レクチャー

Lecturer: **Prof. Shun-ichiro Karato**

Department of Geology and Geophysics, Yale University

Date: Lecture I September 2, 2009 13:00-16:00

Some recent progress in the study of plastic deformation in minerals:
Applications to the dynamics of Earth and other terrestrial planets

Lecture II September 3, 2009 9:00-12:00

A new approach to the equation of state of liquids: Applications to
the evolution of Earth and other terrestrial planets

Seminar September 2, 2009 17:00-18:00

Water Distribution Across the Mantle Transition Zone in Earth and
Its Implications for the Evolution of Ocean

Venue : Meeting room, Sogo-kenkyu-to I 6F, Ehime Univ.

URL : http://deep-earth-mineralogy.jp/g-coe2008/events/shoukai_012.html

Contact : yamada@sci.ehime-u.ac.jp TEL +81-(0)89-927-9651

(Travel supports for young scientists are planned. Contact the above address for the details.)
