

## Poster Sessions

- P01** H. Yusa  
*LHDAC systems for materials science at NIMS*
- P02** J. Ando, I. Katayama  
*TANDEM in Hiroshima University*
- P03** K. Fujino, T. Nagai, H. Miura, D. Hamane, Y. Seto  
*Recent and future studies of mineralogy group at Hokkaido University*
- P04** A. Yoneda, D. Yamazaki, T. Yoshino  
*High-pressure research at ISEI, Okayama University*
- P05** H. Kojitani, M. Akaogi  
*Stability of high-pressure materials by thermodynamic approach*
- P06** N. Nishiyama, T. Irifune, K. Wada, T. Maeda, T. Kawazoe  
*Developments of high-pressure deformation apparatuses at GRC, Ehime Univ. – MADONNA and Drickamer-cell -*
- P07** F. Wang, D. He  
*Two-stage split-sphere high pressure apparatus based on hinge-cage housed Chinese cubic press*
- P08** T. Kunimoto, T. Irifune  
*Development of ultra-high pressure generation tec. and performance test with various diamond using a 6-8-2 type multi-anvil apparatus*
- P09** T. Kawazoe, N. Nishiyama, T. Irifune  
*Toward melting experiments to 50 GPa and 4000 K using a Kawai apparatus with sintered diamond anvils*
- P10** L. Deng, Z. Gong, Y. Fei, X. Liu  
*Direct shock wave loading of MgSiO<sub>3</sub> perovskite to lower mantle conditions and its equation of state*
- P11** Y. Tange, Y. Nishihara, T. Tsuchiya  
*Unified analyses for P-V-T equation of state of MgO: A solution for pressure-scale problems in high P-T experiments*
- P12** G. Mallmann, H. O'Neill, F. Jenner, M. Norman, S. Egginis, R. Arcutus, C. Ballhaus  
*Determining the redox state of basalts and picrites using V/Sc olivine-melt partitioning: experimental calibration and application to natural systems*
- P13** K. Wada, N. Nishiyama, T. Irifune, T. Nagai  
*Phase relation of FeAlO<sub>3</sub> at high pressure and temperature*
- P14** S. Gréaux, N. Nishiyama, Y. Kono, H. Ohfuchi, T. Shinmei, T. Irifune  
*Phase Equilibrium of Ca- and Al-silicate hosts up to 24 GPa and 2000 K*
- P15** N. Tsujino, Y. Nishihara  
*Grain-growth kinetics of ferropericlase at high-pressure*
- P16** T. Shinmei, T. Irifune  
*Phase transitions and density changes in pyrolite up to ~ 50 GPa using multianvil apparatus with sintered diamond anvils*

- P17** Y. Wu, Y. Fei, Z. Jin, X. Liu  
*The Fate of Subducted Continental Crust: an Experimental Perspective*
- P18** T. Kawamoto  
*Fluids in subduction zone 1: significance of elemental partitioning between aqueous fluids and silicate melts*
- P19** T. Kawasaki  
*Metamorphic P–T Path of Rundvågshetta, Lüzow-Holm Complex, East Antarctica inferred from High-Pressure Experimental and Petrographical Data*
- P20** N. Doi, T. Kato, T. Kubo  
*Experimental study on eclogite formation from basaltic oceanic crust*
- P21** D. Fan, W. Zhou, C. Liu, Y. Liu, Y. Xing, J. Liu, L. Bai, H. Xie  
*Thermal equation of state of almandine up to 27.7 GPa and 533 K*
- P22** D. Fan, W. Zhou, C. Liu, Y. Liu, Y. Xing, J. Liu, Y. Li, H. Xie  
*In situ X-ray diffraction study of natural stibnite at high pressure and high temperature*
- P23** H. Ishibashi  
*Non-Newtonian behavior of plagioclase-bearing magma: subliquidus viscosity measurement of Fuji 1707 basalt*
- P24** S. Odake, S. Fukura, M. Arakawa, A. Ohta, B. Harte, H. Kagi  
*Micro-XANES measurements of the oxidation state of chromium in natural ferropericlase inclusions*
- P25** Y. Terada, J. Ando, J. Zhang, H. W. Green, I. Katayama  
*Deformation Experiment of Antigorite Serpentinite and Microstructures Observation*
- P26** K. Hirauchi, I. Katayama,  
*Simple shear deformation of low-temperature serpentines*
- P27** C. Yang, Z Jin  
*Fabric and water content of olivine in mantle xenoliths from Mingxi and Damaping, eastern China*
- P28** Y. Nishihara, K. Funakoshi, Y. Higo, H. Terasaki, N. Nishiyama, T. Kubo, A. Shimojuku, N. Tsujino  
*Stress relaxation test of olivine under Earth's deep upper mantle conditions*
- P29** R. Farla, I. Jackson, J. F. Gerald, H. Kokkonen, U. Faul, A. barnhoorn  
*Dislocation Recovery and Damping in Upper Mantle Materials*
- P30** Y. Wang, J. Zhang, Z. Jin, H. W. Green II  
*Rheology of mafic granulite at high pressure and temperature: implications for crust-mantle interactions*
- P31** C. Zhou, Z. Zeng  
*Strain analysis of the matrix of bone-shaped boudinages from Tieshan, Hubei, China*
- P32** K. Matsukage, S. Kikuchi, S. Ono  
*The density and seismic velocities of chromitite body in mantle peridotite*
- P33** Y. Kono, H. Ohfushi, S. Gréaux, T. Inoue, T. Irifune, Y. Higo  
*Elastic wave velocities of grossular garnet up to 17 GPa and 1650 K*
- P34** Y. Higo, Y. Kono, T. Inoue, T. Irifune, K. Funakoshi  
*Elastic wave velocities measurements under the condition of lowermost mantle transition region*

- P35** M. Kobayakawa, A. Yamada  
*Thermal structure in the lowermost mantle inferred from short-period P-wave reflections from the D'' layer*
- P36** Y. Usui, M. Kanao, A. Kubo, Y. Hiramatsu, H. Negishi  
*Anisotropic structure caused by past tectonic events in the upper mantle beneath East Antarctica and Sri Lanka*
- P37** N. Shibata, A. Yamada  
*Structures of CMB and ICB regions beneath the Japan Islands inferred from PcP and PKiKP waves*
- P38** J. Tsuchiya, T. Tsuchiya  
*High pressure polymorphism of Al+H-bearing SiO<sub>2</sub>: ab initio investigation*
- P39** Y. Kuwayama, K. Hirose, N. Sata, Y. Ohishi  
*Phase relations of iron-silicon alloys at high pressure and high temperature*
- P40** Yi-Jie Lin, Chia-Hui Lin, Chih-ming Lin, T. Yu, Z. Liu, J. Kung  
*X-ray Diffraction and spectroscopic studies of CaSnO<sub>3</sub> perovskite at high pressure*
- P41** H. Hirai, S. Machida, T. Kawamura, Y. Yamamoto, T. Yagi  
*Phase changes of methane hydrate under high pressure and their implications for icy planets and satellites*
- P42** L. Rui  
*Research on Raman spectra of 1-hexanol at high pressure*
- P43** H. Ohfuchi, K. Aibara, H. Sumiya, T. Irifune  
*Micro-texture and structure of high-pressure quenched graphite*
- P44** H. Ohfuchi  
*Laser heating in “nano-polycrystalline” diamond anvil cell - Application for melting experiments of iron*
- P45** L. Lei, D. He  
*Synthesis of GaN crystals through solid-state metathesis reaction under high pressure*
- P46** D. Li, D. Yu, J. He, Y. Tian  
*Synthesis of BC<sub>3.3</sub>N compounds at high pressure and high temperature*
- P47** M. Arakawa, H. Fukazawa, H. Kagi  
*Structure analysis of hydrogen-ordered ice using infrared spectroscopy and neutron diffraction measurements*
- P48** Y. Zou, D. He, R. Yu, T. Lu  
*Transparent Mechanism in Nanocrystalline MgAl<sub>2</sub>O<sub>4</sub> Ceramics via High-pressure Sintering*
- P49** Y. Ohgi, H. Kagi, H. Arima, A. Ohta, K. Kamada, A. Yoshikawa, K. Sugiyama  
*Crystal Growth and Structural Characterizations of Ce-doped Gd<sub>9.33</sub>(SiO<sub>4</sub>)<sub>6</sub>O<sub>2</sub> Single Crystals*
- P50** C. Wang, X. Liu, Z. Jin  
*High-Pressure and High-Temperature Synthesis and Structure Characterization of Chiral Lutetium Disilicate*
- P51** Q. Sun  
*Raman spectroscopic study for the aqueous NaCl salinity*
